

Fully Funded for any adult living in Stoke on Trent

Encouraging Attachment & Bonding With Children

A secure attachment bond ensures that a child will feel secure, understood, and calm enough to experience optimal development of his or her nervous system. Difficulties in the formative years can inhibit emotional, mental, and even physical development, leading to difficulties in learning and forming relationships in later life.

This course looks at the importance of stimulation in early brain development and explores ways to develop strong attachments in babies, children & adolescents

Thursday 4 July 2019

9.00 till 14.30

Venue

All Saints Church (Hall)

512 Leek Road, Hanley. ST1 3HU
